AG NEW MEXICO, FARM CREDIT SERVICES, ACA MANAGEMENT'S DISCUSSION AND ANALYSIS

The following commentary reviews the financial performance of the Ag New Mexico, Farm Credit Services, ACA (Agricultural Credit Association), referred to as the Association, for the quarter ended June 30, 2023. These comments should be read in conjunction with the accompanying financial statements and the December 31, 2022 Annual Report to Stockholders.

The Association is a member of the Farm Credit System (System), a nationwide network of cooperatively owned financial institutions established by and subject to the provisions of the Farm Credit Act of 1971, as amended, and the regulations of the Farm Credit Administration (FCA) promulgated thereunder.

The consolidated financial statements comprise the operations of the ACA and its wholly-owned subsidiaries. The consolidated financial statements were prepared under the oversight of the Association's audit committee.

Significant Events

Effective November 19, 2022, Ag New Mexico Farm Credit Services, ACA signed a letter of intent to pursue a merger transaction with Lone Star Ag Credit, ACA. On June 7, 2023, Ag New Mexico and Lone Star Ag Credit submitted a request to the Farm Credit Administration (FCA) for "preliminary approval" of the merger. This request is currently pending. If FCA grants preliminary approval, each of the associations will hold separate special meetings of stockholders for its voting stockholders to vote on the merger. The merger is conditioned on a favorable vote of each association's voting stockholders and FCA granting final approval of the merger. The proposed effective date for the merger is December 1, 2023, or as soon as practicable thereafter.

In December 2022, the Board of Directors declared a patronage distribution in the amount of \$830,000 which was distributed to the Association's borrowers in the second quarter of 2023. The amount declared was based on the Association's 2022 operating results.

The U.S. Bureau of Labor Statistics indicated that the U.S. unemployment rate increased month-over-month from 3.4 percent in April to 3.7 percent in May 2023. Despite the slight increase, year-over-year unemployment rate for May 2023 is down for the state of New Mexico.

The Consumer Price Index for All Urban Consumers increased by 3.0 percent for the 12-month period ending June 2023, above the long-term target of approximately 2.0 percent. The Federal Open Market Committee (FOMC) raised the federal funds rate to a target range of 5.25 – 5.50 percent in July 2023. The 25-basis point increase in July lead to a cumulative increase of about 525 basis points since mid-March 2022. The FOMC reiterated its commitment to returning inflation to its 2.0 percent objective, which may require further tightening in future periods.

On June 29, the U.S. Bureau of Economic Analysis (BEA) released its third estimate of real gross domestic product (GDP) for the first quarter of 2023. U.S. real GDP growth decelerated but continued to expand during the first quarter of 2023 by about 2.0 percent, down from 2.6 percent during the fourth quarter of 2022, but up from -1.6 percent during the same period a year ago. The International Monetary Fund's World Economic Outlook projects that U.S. real GDP growth will be 1.6 percent in 2023 and 1.1 percent in 2024.

The June 2023 edition of the USDA World Agricultural Supply and Demand Estimates (WASDE) report states that farmers are expected to receive lower average farm prices for corn (-27.3 percent), soybeans (-14.8 percent), wheat (-13.0 percent), and cotton (-6.1 percent) in the 2023/24 marketing year compared to the previous season. Similarly, the average price received by farmers for all milk is projected to decrease by about 21.0 percent year-over-year in 2023 and by 1.5 percent in 2024 after rising nearly 37.0 percent in 2022. USDA projects that average steer prices will increase year-over-year by about 18.9 percent in 2023, while broilers and barrows and gilts prices are projected to decline by about 7.4 percent and 20.4 percent, respectively. Random length lumber futures prices (front-month) declined by about 14.6 percent year-over-year as of June 2023; however, on a month-over-month basis, prices rose by nearly 12.8 percent in June.

During the second quarter of 2023, the New Mexico agriculture economy remained sound. Moisture and precipitation varied across the state, with portions of state considered to be in a drought.

Loan Portfolio

Total loans outstanding at June 30, 2023, including nonaccrual loans and sales contracts, were \$388,737,730 compared to \$387,235,937 at December 31, 2022, reflecting an increase of 0.4 percent. Nonaccrual loans as a percentage of total loans outstanding were 1.3 percent at June 30, 2023, compared to 0.5 percent at December 31, 2022.

The Association did not record any recoveries or charge-offs for the quarter ended June 30, 2023. The Association recorded \$3,100 in recoveries and no charge-offs for the same period in 2022. The Association's allowance for loan losses was 0.6 percent and 0.2 percent of total loans outstanding as of June 30, 2023, and December 31, 2022, respectively.

Risk Exposure

High-risk assets include nonaccrual loans, loans that are past due 90 days or more and still accruing interest, formally restructured loans and other property owned. The following table illustrates the Association's components and trends of high-risk assets.

	June 30,	2023	December 3	1, 2022
	Amount	%	Amount	%
Nonaccrual	\$5,014,211	89.3%	\$ 1,751,114	87.6%

Total	\$5,609,149	100.0%	\$ 1,999,182	100.0%

Results of Operations

The Association had net income of \$1,298,037 and \$2,776,943 for the three and six months ended June 30, 2023, as compared to net income of \$1,400,201 and \$2,545,128 for the same period in 2022, reflecting a decrease of 7.3 percent and an increase of 9.1 percent, respectively. Net interest income was \$2,425,501 and \$4,802,540 for the three and six months ended June 30, 2023, compared to \$1,978,519 and \$3,840,295 for the same period in 2022.

Volume	Rate	Total					

	Total	
erest income - loans	\$ 5,479,469	
erest expense	4,517,224	
et interest income	\$ 962,245	
t interest income	\$	962,245

Interest income for the three and six months ended June 30, 2023, increased by \$2,666,044 and \$5,479,469, or 77.7 percent and 85.2 percent respectively, from the same period of 2022, primarily due to increases in yields on earning assets and average loan volume. Interest expense for the three and six months ended June 30, 2023, increased by \$2,219,062 and \$4,517,224, or 152.7 percent and 174.2 percent, from the same period of 2022 due to increases in interest rates and average debt volume. Average loan volume for the second quarter of 2023 was \$380,135,595, compared to \$335,642,435 in the second quarter of 2022. The average net interest rate spread on the loan portfolio for the six months ended June 30, 2023 was 2.08 percent, compared to 2.12 percent for the same period of 2022.

The Association's return on average assets for the six months ended June 30, 2023, was 1.41 percent compared to 1.45 percent for the same period in 2022. The Association's return on average equity for the six months ended June 30, 2023, was 10.08 percent, compared to 9.95 percent for the same period in 2022.

Liquidity and Funding Sources

The Association secures the majority of its lendable funds from the Farm Credit Bank of Texas (the Bank), which obtains its funds through the issuance of System-wide obligations and with lendable equity. The following schedule summarizes the Association's borrowings.

	June 30,	D	ecember 31,
	 2023		2022
Note payable to the Bank	\$ 342,026,925	\$	341,738,541
Accrued interest on note payable	 1,259,974		1,121,629
Total	\$ 343,286,899	\$	342,860,170

The Association operates under a general financing agreement (GFA) with the Bank. The current GFA is effective through September 30, 2023. The primary source of liquidity and funding for the Association is a direct loan from the Bank. The outstanding balance of \$342,026,925 as of June 30, 2023, is recorded as a liability on the Association's balance sheet. The note carried a weighted average interest rate of 4.54 percent at June 30, 2023. The indebtedness is collateralized by a pledge of substantially all of the Association's assets to the Bank and is governed by the general financing agreement. The increase in note payable to the Bank and related accrued interest payable since December 31, 2022, is due to the Association's increase in loan volume. The Association's own funds, which represent the amount of the Association's loan portfolio funded by the Association's equity, were \$44,811,407 at June 30, 2023. The maximum amount the Association may borrow from the Bank as of June 30, 2023, was \$391,299,470 as defined by the general financing agreement. The indebtedness continues in effect until the expiration date of the general financing agreement, which is September 30, 2023, unless sooner terminated by the Bank upon the occurrence of an event of default, or by the Association, in the event of a breach of this agreement by the Bank, upon giving the Bank 30 calendar days' prior written notice, or in all other circumstances, upon giving the Bank 120 days' prior written notice.

Capital Resources

The Association's capital position increased by \$1,801,237 at June 30, 2023, compared to December 31, 2022. The Association's ratio of debt to members' equity was 6.13:1 as of June 30, 2023, compared to 6.36:1 as of December 31, 2022.

Farm Credit Administration regulations require the Association to maintain minimums for various regulatory capital ratios. New regulations became effective January 1, 2017, which replaced the previously required core surplus and total surplus ratios with common equity tier 1, tier 1 capital, and total capital risk-based capital ratios. The new regulations also added tier 1 leverage and unallocated retained earnings and equivalents (UREE) ratios. The permanent capital ratio continues to remain in effect, with some modifications to align with the new regulations. As of June 30, 2023, the Association exceeded all regulatory capital requirements.

Significant Recent Accounting Pronouncements

Refer to Note 1 – "Organization and Significant Accounting Policies" in this quarterly report for disclosures of recent accounting pronouncements which may impact the Association's consolidated financial position and results of operations and for critical accounting policies.

Relationship With the Farm Credit Bank of Texas

The Association's financial condition may be impacted by factors that affect the Bank. The financial condition and results of operations of the Bank may materially affect the stockholder's investment in the Association. The Management's Discussion and Analysis and Notes to Financial Statements contained in the 2022 Annual Report of Association more fully describe the Association's relationship with the Bank.

The annual and quarterly stockholder reports of the Bank are available free of charge, upon request. These reports can be obtained by writing to Farm Credit Bank of Texas, Corporate Communications, P.O. Box 202590, Austin, Texas 78720, or by calling (512) 483-9204. The annual and quarterly stockholder reports for the Bank are also available on its website at *www.farmcreditbank.com*.

The Association's quarterly stockholder reports are also available free of charge, upon request. These reports can be obtained by writing to Ag New Mexico, Farm Credit Services, ACA, 4501 N. Prince St., Clovis, New Mexico, 88101 or calling (575) 762-3828. The annual and quarterly stockholder reports for the Association are also available on its website at www.agnewmexico.com. Copies of the Association's quarterly stockholder reports can also be requested by e-mailing will.fisher@agnewmexico.com.

AG NEW MEXICO, FARM CREDIT SERVICES, ACA NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 — ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES:

The Ag New Mexico, Farm Credit Services, ACA (Agricultural Credit Association), referred to as the Association, is a member-owned cooperative that provides credit and credit-related services to or for the benefit of eligible borrowers/stockholders for qualified agricultural purposes. The Association serves all counties in the state of New Mexico with the exception of San Juan Country and the portion of Rio Arriba County lying west of the Continental Divide. The PCA and FLCA subsidiaries are also authorized to operate in Cochran County, Texas. In addition, the Association and Farm Credit Services of New Mexico, ACA have entered into an agreement that allows the Association to make mortgage loans in New Mexico, on a statewide basis, without obtaining territorial approval. The Association is a lending institution of the Farm Credit System (the System), which was established by Acts of Congress to meet the needs of American agriculture.

Effective November 19, 2022, Ag New Mexico Farm Credit Services, ACA signed a letter of intent to pursue a merger transaction with Lone Star Ag Credit, ACA. On June 7, 2023, Ag New Mexico and Lone Star Ag Credit submitted a request to the Farm Credit Administration (FCA) for "preliminary approval" of the merger. This request is currently pending. If FCA grants preliminary approval, each of the associations will hold separate special meetings of stockholders for its voting stockholders to vote on the merger. The merger is conditioned on a favorable vote of each association's voting stockholders and FCA granting final approval of the merger. The proposed effective date for the merger is December 1, 2023, or as soon as practicable thereafter.

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. (GAAP) for interim financial information. Accordingly, they do not include all of the disclosures required by GAAP for annual financial statements and should be read in conjunction with the audited financial statements as of and for the year ended December 31, 2022, as contained in the 2022 Annual Report to Stockholders.

In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform with generally accepted accounting principles (GAAP), except for the inclusion of a statement of cash flows. GAAP requires a business enterprise that provides a set of financial statements reporting both financial position and results of operations to also provide a statement of cash flows for each period for which results of operations are provided. In regulations issued by FCA, associations have the option to exclude statements of cash flows in interim financial statements. Therefore, the Association has elected not to include a statement of cash flows in these consolidated financial statements. These interim financial statements should be read in conjunction with the audited financial statements as of and for the year ended December 31, 2022, as contained in the 2022 Annual Report to Stockholders. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year ending December 31, 2023. Descriptions of the significant accounting policies are included in the 2022 Annual Report to Stockholders. In the opinion of management, these policies and the presentation of the interim financial condition and results of operations conform with GAAP and prevailing practices within the banking industry.

In March 2022, the Financial Accounting Standards Board (FASB) issued an update entitled, "Financial Instruments - Credit Losses: Troubled Debt Restructurings and Vintage Disclosures." The guidance eliminates the accounting guidance for troubled debt restructurings (TDRs) by creditors while enhancing disclosure requirements for certain loan refinancing and restructurings when a borrower is experiencing financial difficulty. The creditor will have to apply the guidance to determine whether a modification results in a new loan or a continuation of an existing loan. In addition to the TDR guidance, the update requires public business entities to disclose current period gross write-offs by year of origination for financing receivables and net investments in leases within the scope of the credit losses standard. These amendments became effective for the Association at the time of adoption of the measurement of credit losses on financial instruments standard on January 1, 2023.

In June 2016, the FASB issued guidance entitled "Measurement of Credit Losses on Financial Instruments." The guidance replaces the current incurred loss impairment methodology with a single allowance framework for financial assets carried at amortized cost, which reflects management's estimate of expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Credit losses relating to held-to maturity securities and depending on the situation available-for-sale securities would also be recorded through an allowance for credit losses. For public business entities that are not U.S. Securities and Exchange Commission filers including this Association, this guidance became effective for interim and annual reporting periods beginning after December 15, 2022.

The consolidated financial statements comprise the operations of the ACA and its wholly-owned subsidiaries. The preparation of these consolidated financial statements requires the use of management's estimates. The results for the quarter ended June 30, 2023, are not necessarily indicative of the results to be expected for the year ended December 31, 2023. Certain amounts in the prior period's financial statements may have been reclassified to conform to current financial statement presentation.

Recently Adopted Accounting Pronouncements

The Association adopted Financial Accounting Standards Board (FASB) guidance entitled "Measurement of Credit Losses on Financial Instruments" and other subsequently issued accounting standards updates related to credit losses on January 1, 2023. This guidance replaced the current incurred loss impairment methodology with a single allowance framework for financial assets carried at amortized cost and certain off-balance sheet credit exposures. This guidance requires management to consider in its estimate of the allowance for credit losses (ACL) relevant historical events, current conditions and reasonable and supportable forecasts that affect the collectability of the assets. In addition, the guidance amends existing impairment guidance for held-to-maturity and available-forsale investments to incorporate an allowance for credit losses related to these securities, which will allow for the reversal of credit impairments in the event that the credit of an issuer improves.

Also adopted effective January 1, 2023, was the updated guidance entitled "Financial Instruments – Credit Losses: Troubled Debt Restructurings and Vintage Disclosure." This guidance requires the creditor to determine whether a modification results in a new loan or a continuation of an existing loan, among other disclosures specific to modifications with borrowers that are experiencing financial difficulties. The update eliminated the accounting guidance for troubled debt restructurings by creditors. The update also requires disclosure of current period gross write-offs by year of origination for financing receivables and net investments in leases.

The following table presents the impact to the allowance for credit losses and retained earnings upon adoption of this guidance on January 1, 2023:

	Dec				
	2022		CECL adoption impact		nuary 1, 2023
Assets:	·				_
Allowance for credit losses on loans	\$	893,695	\$ 942,222	\$	1,835,917
Deferred tax assets		343,146	49,228	;	392,374
Liabilities:					
Allowance for credit losses on unfunded commitments		46,323	21,401		67,724
Retained earnings:					
Unallocated retained earnings, net of tax		54,695,891	(963,622	2)	53,732,269

Loans and Allowance for Credit Losses

Loans are generally carried at their principal amount outstanding adjusted for charge-offs, deferred loan fees or costs, and valuation adjustments relating to hedging activities. Loan origination fees and direct loan origination costs are netted and capitalized, and the net fee or cost is amortized over the average life of the related loan as an adjustment to interest income. Loan prepayment fees are reported in interest income. Interest on loans is accrued and credited to interest income based on the daily principal amount outstanding.

Nonaccrual Loans

Nonaccrual loans are loans for which there is reasonable doubt that all principal and interest will be collected according to the original contractual terms and are generally considered substandard or doubtful, which is in accordance with the loan rating model, as described below. A loan is considered contractually past due when any principal repayment or interest payment required by the loan instrument is not received on or before the due date. A loan shall remain contractually past due until it is modified or until the entire amount past due, including principal, accrued interest, and penalty interest incurred as the result of past due status, is collected or otherwise discharged in full.

Consistent with prior practice, loans are generally placed in nonaccrual status when principal or interest is delinquent for 90 days (unless adequately secured and in the process of collection), circumstances indicate that collection of principal and interest is in doubt or legal action, including foreclosure or other forms of collateral conveyance, has been initiated to collect the outstanding principal and interest. At the time a loan is placed in nonaccrual status, accrued interest that is considered uncollectible is reversed (if accrued in the current year) or charged against the allowance for loan losses (if accrued in prior years). Loans are charged-off at the time they are determined to be uncollectible.

When loans are in nonaccrual status, interest payments received in cash are generally recognized as interest income if the collectability of the loan principal is fully expected and certain other criteria are met. Otherwise, payments received on nonaccrual loans are applied against the recorded investment in the loan asset. Nonaccrual loans are returned to accrual status if all contractual principal and interest is current, the borrower is fully expected to fulfill the contractual repayments terms and after remaining current as to principal and interest for a sustained period or have a recent repayment pattern demonstrating future repayment capacity to make on-time payments. If previously unrecognized interest income exists at the time the loan is transferred to accrual status, cash received at the time of or subsequent to the transfer should first be recorded as interest income until such time as the recorded balance equals the contractual indebtedness of the borrower.

Accrued Interest Receivable

The Association elected to continue classifying accrued interest on loans and investment securities in accrued interest receivable and not as part of loans or investments on the Consolidated Balance Sheet. The Association also elected to not estimate an allowance on interest receivable balances because the nonaccrual policies in place provide for the accrual of interest to cease on a timely basis when all contractual amounts are not expected.

Loan Modifications to Borrowers Experiencing Financial Difficulty

Loan modifications may be granted to borrowers experiencing financial difficulty. Modifications can be in the form of one or a combination of principal forgiveness, interest rate reduction, other-than-insignificant payment delay or a term extension. Covenant waivers and modifications of contingent acceleration clauses are not considered term extensions.

Collateral Dependent Loans

Collateral dependent loans are loans secured by collateral, including but not limited to agricultural real estate, crop inventory, equipment and livestock. CECL requires the Association to measure the expected credit losses based on fair value of the collateral at the reporting date when the Association determines that foreclosure is probable. Additionally, CECL allows a fair value practical expedient as a measurement approach for loans when the repayment is expected to be provided substantially through the operation or sale of the collateral when the borrower is experiencing financial difficulties. Under the practical expedient measurement approach, the expected credit losses is based on the difference between the fair value of the collateral less estimated costs to sell and the amortized cost basis of the loan.

Purchased Credit Deteriorated Loans (PCD)

The adoption of CECL guidance resulted in a change in the accounting for purchased credit impairment loans, which are considered PCD loans under CECL. Purchased loans are recorded at their fair value at the acquisition date. An allowance for credit loss is recorded on the purchased loans at the purchase date through a provision for credit losses. Any loans that have experienced a more-than-insignificant deterioration in credit quality since origination are identified as PCD assets and the Association is required to estimate and record an allowance for credit losses for these assets at the time of purchase. This allowance is then added to the purchase price to establish the initial amortized cost basis of the PCD assets, rather than being reported as a credit loss expense. The difference between the unpaid principal balance and the amortized cost basis is recorded into interest income over the life of the loan on a level-yield basis. Any subsequent changes in expected credit losses are recorded through the income statement with a provision for credit loss.

Allowance for Credit Losses

Beginning January 1, 2023, the allowance for credit losses (ACL) represents the estimated current expected credit losses over the remaining contractual life of financial assets measured at amortized cost and certain off-balance sheet credit exposures. The ACL takes into consideration relevant information about past events, current conditions and reasonable and supportable macroeconomic forecasts of future conditions. The contractual term excludes expected extensions, renewals and modifications unless the extension or renewal options are not unconditionally cancellable. The ACL comprises:

- the allowance for credit losses on loans (ACLL)
- the allowance for credit losses on unfunded commitments, which is presented on the balance sheet in other liabilities, and
- the allowance for credit losses on investment securities, which covers held-to-maturity and available-for-sale securities and is recognized within each investment securities classification on the Consolidated Balance Sheet.

Determining the appropriateness of the allowance is complex and requires judgment by management about the effect of matters that are inherently uncertain. Subsequent evaluations of the loan portfolio, considering macroeconomic conditions, forecasts and other factors prevailing at the time, may result in significant changes in the ACL in those future periods.

Methodology for Allowance for Credit Losses on Loans

The ACLL represents management's estimate of credit losses over the remaining expected life of loans. Loans are evaluated on the amortized cost basis, including premiums, discounts and fair value hedge accounting adjustments.

The Association employs a disciplined process and methodology to establish its ACLL that has two basic components: first, an asset-specific component involving individual loans that do not share risk characteristics with other loans and the measurement of expected credit losses for such individual loans; and second, a pooled component for estimated expected credit losses for pools of loans that share similar risk characteristics.

Asset-specific loans are generally collateral-dependent loans (including those loans for which foreclosure is probable) and nonaccrual loans. For an asset-specific loan, expected credit losses are measured as the difference between the amortized cost basis in the loan and the present value of expected future cash flows discounted at the loan's effective interest rate except that, for collateral-dependent loans, credit loss is measured as the difference between the amortized cost basis in the loan and the fair value of the underlying collateral. The fair value of the collateral is adjusted for the estimated cost to sell if repayment or satisfaction of a loan is dependent on the sale (rather than only on the operation) of the collateral. In accordance with the Association's appraisal policy, the fair value of collateral-dependent loans is based upon independent third-party appraisals or on collateral valuations prepared by in-house appraisers. When an updated appraisal or collateral valuation is received, management reassesses the need for adjustments to the loan's expected credit loss measurements and, where appropriate, records an adjustment. If the calculated expected credit loss is determined to be permanent, fixed or non-recoverable, the credit loss portion of the loan will be charged off against the allowance for credit losses.

In estimating the components of the ACLL that share common risk characteristics, loans are evaluated collectively and segregated into loan pools considering the risk associated with the specific pool. Relevant risk characteristics include loan type, commodity, credit quality rating, delinquency category or business segment or a combination of these classes. The allowance is determined based on a quantitative calculation of the expected life-of-loan loss percentage for each loan category by considering the probability of default, based on the migration of loans from performing to loss by credit quality rating or delinquency buckets using historical life-of-loan analysis periods for loan types, and the severity of loss, based on the aggregate net lifetime losses incurred per loan pool.

The components of the ACLL also considers factors for each loan pool to adjust for differences between the historical period used to calculate historical default and loss severity rates and expected conditions over the remaining lives of the loans in the portfolio related to:

- lending policies and procedures;
- national, regional and local economic business conditions and developments that affect the collectability of the portfolio, including the condition of various markets;
- the nature of the loan portfolio, including the terms of the loans;
- the experience, ability and depth of the lending management and other relevant staff;
- the volume and severity of past due and adversely classified or graded loans and the volume of nonaccrual loans;
- the quality of the loan review and process:
- the value of underlying collateral for collateral-dependent loans;
- the existence and effect of any concentrations of credit and changes in the level of such concentrations; and
- the effect of external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the existing portfolio.

The Association uses multiple scenarios over a reasonable and supportable forecast period of two years. Subsequent to the forecast period, the Association reverts to long run historical loss experience beyond the two years on a straight-line basis over a one-year reversion period to inform the estimate of losses for the remaining contractual life of the loan portfolio.

The economic forecasts incorporate macroeconomic variables, including unemployment rates, real gross domestic product levels and corporate bond spreads, as well as net farm income and agricultural commodity prices. Also considered are loan and borrower characteristics, such as internal risk ratings, delinquency status, collateral type, and the remaining term of the loan, adjusted for expected prepayments.

In addition to the quantitative calculation, the Association considers the imprecision inherent in the process and methodology, emerging risk assessments and other subjective factors, which may lead to a management adjustment to the modeled ACLL results. Expected credit loss estimates also include consideration of expected cash recoveries on loans previously charged-off or expected recoveries on collateral dependent loans where recovery is expected through sale of the collateral. The economic forecasts are updated on a quarterly basis.

Prior to January 1, 2023, the allowance for loan losses was maintained at a level considered adequate to provide for probable losses existing in and inherent in the loan portfolio. The allowance was based on a periodic evaluation of the loan portfolio in which numerous factors were considered, including economic conditions, collateral values, borrowers' financial conditions, loan portfolio composition and prior loan loss experience. The allowance for loan losses encompassed various judgments, evaluations and appraisals with respect to the loans and their underlying collateral that, by their nature, contain elements of uncertainty and imprecision. Changes in the agricultural economy and their impact on borrower repayment capacity would cause these various judgments, evaluations and appraisals to change over time. Management considered a number of factors in determining and supporting the levels of the allowances for loan losses, which included, but were not limited to, the concentration of lending in agriculture, combined with uncertainties associated with farmland values, commodity prices, exports, government assistance programs, regional economic effects and weather-related influences.

Allowance for Credit Losses on Unfunded Commitments

The Association evaluates the need for an allowance for credit losses on unfunded commitments under CECL and, if required, an amount is recognized and included in other liabilities on the Consolidated Balance Sheet. The amount of expected losses is determined by calculating a commitment usage factor over the contractual period for exposures that are not unconditionally cancellable by the Association and applying the loss factors used in the ACLL methodology to the results of the usage calculation. No allowance for credit losses are recorded for commitments that are unconditionally cancellable.

NOTE 2 — LOANS AND ALLOWANCE FOR CREDIT LOSSES:

A summary of loans follows:

	June 30,			ecember 31,
Loan Type	2023			2022
Production agriculture:				
Real estate mortgage	\$	221,817,459	\$	222,085,341
Production and				
intermediate-term		72,921,903		72,041,884
Agribusiness:				
Processing and marketing		40,305,734		42,502,119

Energy	3,789,230	-	=	-	3,789,230	-		
Lease receivables	1,416,362	-	-	-	1,416,362	-		
Rural residential real estate		3,999,552				3,999,552		
Total	\$ 113,207,861	\$ 87,397,070	\$ -	\$ 1,289,127	\$ 113,207,861	\$ 88,686,197		

The Association is authorized under the Farm Credit Act to accept "advance conditional payments" (ACPs) from borrowers. To the extent the borrower's access to such ACPs is restricted and the legal right of setoff exists, the ACPs are netted against the borrower's related loan balance. Unrestricted advance conditional payments are included in other liabilities. ACPs are not insured, and interest may be paid by the Association on such balances. Balances of ACPs were \$2,019,226 and \$1,839,428 at June 30, 2023, and December 31, 2022, respectively.

Credit Quality

Credit risk arises from the potential inability of an obligor to meet its payment obligation and exists in our outstanding loans, letters of credit and unfunded loan commitments. The Association manages credit risk associated with the retail lending activities through an analysis of the credit risk profile of an individual borrower using its own set of underwriting standards and lending policies, approved by its board of directors, which provides direction to its loan officers. The retail credit risk management process begins with an analysis of the borrower's credit history, repayment capacity, financial position and collateral, which includes an analysis of credit scores for smaller loans. Repayment capacity focuses on the borrower's ability to repay the loan based on cash flows from operations or other sources of income, including off-farm income. Real estate mortgage loans must be secured by first liens on the real estate (collateral). As required by Farm Credit Administration regulations, each institution that makes loans on a secured basis must have collateral evaluation policies and procedures. Real estate mortgage loans may be made only in amounts up to 85 percent of the original appraised value of the property taken as security or up to 97 percent of the appraised value if guaranteed by a state, federal, or other governmental agency. The actual loan to appraised value when loans are made is generally lower than the statutory maximum percentage. Loans other than real estate mortgage may be made on a secured or unsecured basis.

The Association uses a two-dimensional risk rating model based on an internally generated combined System risk rating guidance that incorporates a 14-point probability of default rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default. Probability of default is the probability that a borrower will experience a default during the life of the loan. The loss given default is management's estimate as to the anticipated principal loss on a specific loan assuming default occurs during the remaining life of the loan. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower or the loan is classified nonaccrual. This credit risk rating process incorporates objective and subjective criteria to identify inherent strengths, weaknesses and risks in a particular relationship. The Association reviews, at least on an annual basis, or when a credit action is taken the probability of default category.

Each of the probability of default categories carries a distinct percentage of default probability. The probability of default rate between one and nine of the acceptable categories is very narrow and would reflect almost no default to a minimal default percentage. The probability of default rate grows more rapidly as a loan moves from acceptable to other assets especially mentioned and grows significantly as a loan moves to a substandard (viable) level. A substandard (non-viable) rating indicates that the probability of default is almost certain. These categories are defined as follows:

- acceptable assets are expected to be fully collectible and represent the highest quality,
- other assets especially mentioned (OAEM) assets are currently collectible but exhibit some potential weakness,
- substandard assets exhibit some serious weakness in repayment capacity, equity, or collateral pledged on the loan,
- doubtful assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing facts, conditions and values that make collection in full highly questionable, and
- loss assets are considered uncollectible.

The following table shows loans under the Farm Credit Administration Uniform Loan Classification System as a percentage of total loans by loan type as of:

Real estate mortgage		June 30, 2023	December 31, 2022

Accrued interest receivable on loans of \$6,323,410 and \$5,709,255 at June 30, 2023, and December 31, 2022 have been excluded from the amortized cost of loans and reported separately in the Consolidated Balance Sheets.

The following table reflects nonperforming assets, which consist of nonaccrual loans, loans that are past due 90 days or more and still accruing interest, and other property owned, and related credit quality statistics:

	June 30, 2023	De	ecember 31, 2022
Nonaccrual loans:			
Production and intermediate-term	\$ 3,030,897	\$	-
Agribusiness	1,781,013		1,537,959
Real estate mortgage	112,341		120,117
Rural residential real estate	 89,960		93,038
Total nonaccrual loans	 5,014,211		1,751,114
Accruing loans 90 days or more past due:			
Real estate mortgage	592,163		-
Production and intermediate-term	 -		245,293
Total accruing loans 90 days or more past due	592,163		245,293
Other property owned	2,775		2,775
Total nonperforming assets	\$ 5,609,149	\$	1,999,182
Nonaccrual loans as a percentage of total loans	1.29%		0.45%
Nonperforming assets as a percentage of total loans and	1.44%		0.52%
other property owned	9.87%		3.63%
Nonperforming assets as a percentage of capital	9.0/70		3.03%

The following table provides the amortized cost for nonaccrual loans with and without a related allowance for loan losses, as well as interest income recognized on nonaccrual loans during the period:

		June 30, 2023						Interest Income Recognized			
	C	Amortized Cost with Allowance		Cost with without			Total	For the Three Months Ended June 30, 2023		For the Six Months End June 30, 2023	
Production and intermediate-term	\$	468,820	\$	2,562,077	\$	3,030,897	\$	-	\$	35,281

Total	\$ 797,774	\$ 364,634	\$ 1,162,408	\$ 391,782,784	\$ 392,945,192	\$ 245,293

A loan is considered collateral dependent when the borrower is experiencing financial difficulty and repayment is expected to be provided substantially through the operation or sale of the collateral. The collateral dependent loans are primarily real estate mortgage and rural residential real estate loans.

Allowance for Credit Losses

The credit risk rating methodology is a key component of the Association's allowance for credit losses evaluation and is generally incorporated into the Association's loan underwriting standards and internal lending limits. In addition, borrower and commodity concentration lending and leasing limits have been established by the Association to manage credit exposure. The regulatory limit to a single borrower or lessee is 15 percent of the Association's lending and leasing limit base, but the Association's board of directors has generally established more restrictive lending limits. This limit applies to Associations with long-term and short-term and intermediate-term lending authorities, and to the Banks' (other than CoBank) loan participations.

Effective January 1, 2023, the Association adopted the CECL accounting guidance as described in Note 1. A summary of changes in the allowance for credit losses by portfolio segment are as follows:

		al Estate Iortgage		ction and liate Term	Agri	business	Comr	nunications	Energy	Wa	ter and Waste Water	Rural Residential Real Estate	International	Lease Receievables		Total

¹ For periods prior to January 1, 2023, the allowance for loan losses was based on probable and estimable losses inherent in the loan portfolio.

The Association did not materially modify any loans with borrowers experiencing financial difficulty as of June 30, 2023.

Troubled Debt Restructurings

Prior to January 1, 2023, the adoption of updated FASB guidance on loan modifications, a restructuring of a loan constituted a troubled debt restructuring, also known as formally restructured, if the creditor for economic or legal reasons related to the borrower's financial difficulties granted a concession to the borrower that it would not otherwise consider. Concessions varied by program and were borrower-specific and could include interest rate reductions, term extensions, payment deferrals or the acceptance of additional collateral in lieu of payments. In limited circumstances, principal may have been forgiven. When a restructured loan constituted a troubled debt restructuring, these loans were included within our impaired loans under nonaccrual or accruing restructured loans.

As of December 31, 2022, the Association had no troubled debt restructured loans.

NOTE 3 — LEASES:

The components of lease expense were as follows:

	F	For the Three	ths Ended	For the Six Months Ended				
	Jun	June 30, 2023		June 30, 2022		ne 30, 2023	June 30, 2022	
Operating lease cost	\$	60,448	\$	48,033	\$	120,895	\$	71,765
Net lease cost	\$	60,448	\$	48,033	\$	120,895	\$	71,765

Other information related to leases was as follows:

	Fo	r the Three Mor	nths Ended		For the Six Mor	nths Ended
	June 30	, 2023	June 30, 2022	June	30, 2023	June 30, 2022
Cash paid for amounts included in the measurement of lease liabilities: Operating cash flows from operating leases Right-of-use assets obtained in exchange for lease obligations:	\$	60,448 \$	48,03	33 \$	120,895 \$	71,765
Operating leases		57,057	44,3	17	113,650	66,571
Lease term and discount rate are as follows:						
		June 3	0, 2023	December	31, 2022	
Weighted average remaining lease term in years						
Operating leases			1.4		1.9	
Weighted average discount rate						
Operating leases			2.72%		3.38%	

Future minimum lease payments under non-cancellable leases as of June 30, 2023, were as follows:

	O	perating
		Leases
2023 (excluding the six months ended 6/30/23)	\$	105,777
2024		174,353
2025		48,600
2026		-
Thereafter		
Total	\$	328,730

NOTE 4 — CAPITAL:

The Association's board of directors has established a Capital Adequacy Plan (Plan) that includes the capital targets that are necessary to achieve the Association's capital adequacy goals as well as the minimum permanent capital standards. The Plan monitors projected dividends, equity retirements and other actions that may decrease the Association's permanent capital. In addition to factors that must be considered in meeting the minimum standards, the board of directors also monitors the following factors: capability of management; quality of operating policies, procedures and internal controls; quality and quantity of earnings; asset quality and the adequacy of the allowance for losses to absorb potential loss within the loan and lease portfolios; sufficiency of liquid funds; needs of an Association's customer base; and any other risk-oriented activities, such as funding and interest rate risk, potential obligations under joint and several liability, contingent and off-balance-sheet liabilities or other conditions warranting additional capital. At least quarterly, management reviews the Association's goals and objectives with the board.

	J	ine 30, 2023	Dec	ember 31, 2022
Capital stock and participation certificates	\$	406,265	\$	416,105
Accumulated other comprehensive loss		(80,196)		(77,952)
Unallocated retained earnings ¹		56,509,212		54,695,891
Total Capital	\$	56,835,281	\$	55,034,044

¹ Unallocated retained earnings for the quarter ended June 30, 2023, reflects an increase/decrease from the cumulative effect of a change in accounting principle for CECL on January 1, 2023.

Regulatory Capitalization Requirements

Risk-adjusted:	Regulatory Requirements Including Capital Conservation Buffers	As of June 30, 2023
Common equity tier 1 ratio	7.00%	12.64%
Tier 1 capital ratio	8.50%	12.64%
Total capital ratio	10.50%	13.23%
Permanent capital ratio	7.00%	12.71%
Non-risk-adjusted:		
Tier 1 leverage ratio	5.00%	12.05%
UREE leverage ratio	1.50%	11.94%

The following tables present the activity in the accumulated other comprehensive loss, net of tax by component:

	Accumulated Other Comprehensive Loss			
Balance at March 31, 2023 Other comprehensive loss before reclassifications Amounts reclassified from accumulated other comprehensive loss	\$	(79,074) (1,122)		
Net current period other comprehensive loss Balance at June 30, 2023	\$	(1,122) (80,196)		
Balance at December 31, 2022 Other comprehensive loss before reclassifications Amounts reclassified from accumulated other comprehensive loss	\$	(77,952) (2,244)		
Net current period other comprehensive loss Balance at June 30, 2023	\$	(2,244) (80,196)		
	Accumulated Other Comprehensive Loss			
Balance at March 31, 2022 Other comprehensive income before reclassifications Amounts reclassified from accumulated other comprehensive loss Net current period other comprehensive income Balance at June 30, 2022	\$	(495,467) 5,586 - - (489,881)		
Balance at December 31, 2021 Other comprehensive income before reclassifications Amounts reclassified from accumulated other comprehensive loss Net current period other comprehensive income Balance at June 30, 2022	\$	(501,053) 11,172 - 11,172 (489,881)		

The Association's accumulated other comprehensive loss relates entirely to its non-pension other postretirement benefits. Amortization of prior service credits and of actuarial loss are reflected in "Salaries and employee benefits" in the Consolidated Statements of Comprehensive Income. The following table summarizes the change in accumulated other comprehensive loss for the six months ended June 30:

	2023	2022
Accumulated other comprehensive loss at January 1	\$ (77,952)	\$ (501,053)
Amortization of prior service credit included		
in salaries and employee benefits	(2,244)	(2,242)
Amortization of actuarial loss included		
in salaries and employee benefits		13,414
Other comprehensive (loss) income, net of tax	(2,244)	11,172
Accumulated other comprehensive loss at June 30	\$ (80,196)	\$ (489,881)

NOTE 5 — INCOME TAXES:

Ag New Mexico, Farm Credit Services, ACA conducts its business activities through two wholly-owned subsidiaries. Long-term mortgage lending activities are conducted through a wholly-owned FLCA subsidiary which is exempt from federal and state income tax. Short- and intermediate-term lending activities are conducted through a wholly-owned PCA subsidiary. The PCA subsidiary and the ACA holding company are subject to income tax. Ag New Mexico, Farm Credit Services, ACA operates as a cooperative that qualifies for tax treatment under Subchapter T of the Internal Revenue Code. Accordingly, under specified conditions, Ag New Mexico, Farm Credit Services, ACA can exclude from taxable income amounts distributed as qualified patronage dividends in the form of cash, stock or allocated retained earnings. Provisions for income taxes are made only on those taxable earnings that will not be distributed as qualified patronage dividends. Deferred taxes are recorded at the tax effect of all temporary differences based on the assumption that such temporary differences are retained by the Association and will therefore impact future tax payments. A valuation allowance is provided against deferred tax assets to the extent that it is more likely than not (more than 50 percent probability), based on management's estimate, that they will not be realized.

NOTE 6 — FAIR VALUE MEASUREMENTS:

FASB guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability. See Note 14 in the 2022 Annual Report to Stockholders for a more complete description.

Assets measured at fair value on a nonrecurring basis, which are fair value measurements that are triggered by particular circumstances such as impaired assets, for each of the fair value hierarchy values are summarized below. The Association did not have any liabilities measured at fair value on a nonrecurring basis.

June 30, 2023	Fair Value Measurement Using				To	tal Fair		
	Lev	el 1	Lev	el 2	I	Level 3		Value
Assets:						_		
Loans*	\$	-	\$	-	\$1	,039,735	\$ 1	,039,735
Other property owned		-		-		2,775		2,775
<u>December 31, 2022</u>		Fair Value Measurement Using				ing	To	otal Fair
	Level 1 Level 2			Level 3		Value		
Assets:								
Loans*	\$	-	\$	-	\$	970,280	\$	970,280
Other property owned		-		-		2,775		2,775

^{*}Represents the fair value of certain loans that were evaluated for impairment under the authoritative guidance "Accounting by Creditors for Impairment of a Loan." The fair value was based upon the underlying collateral since these were collateral-dependent loans for which real estate is the collateral.

With regard to nonrecurring measurements for impaired loans and other property owned, it is not practicable to provide specific information on inputs, as each collateral property is unique. System Associations utilize appraisals to value these loans and other property owned and take into account unobservable inputs, such as income and expense, comparable sales, replacement cost and comparability adjustments.

Valuation Techniques

As more fully discussed in Note 14 to the 2022 Annual Report to Stockholders, authoritative guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following represent a brief summary of the valuation techniques used for the Association's assets and liabilities. For a more complete description, see the 2022 Annual Report to Stockholders.

Loans Evaluated for Impairment

For certain loans evaluated for impairment under FASB impairment guidance, the fair value is based upon the underlying collateral since the loans are collateral-dependent loans for which real estate is the collateral. The fair value measurement process uses independent appraisals and other market-based information, but in many cases, it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, a majority of these loans have fair value measurements that fall within Level 3 of the fair value hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

Other Property Owned

Other property owned is generally classified as Level 3 of the fair value hierarchy. The process for measuring the fair value of the other property owned involves the use of independent appraisals and other market-based information. Costs to sell represent transaction costs and are not included as a component of the asset's fair value. As a result, these fair value measurements fall within Level 3 of the hierarchy.

NOTE 7 — EMPLOYEE BENEFIT PLANS:

The following table summarizes the components of net periodic benefit costs of non-pension postretirement employee benefits for the three and six months ended June 30:

	Other Benefits			
		2022		
Service cost	\$	5,698	\$	8,294
Interest cost		17,172		13,309
Amortization of prior service credits		(1,122)		(1,121)
Amortization of net actuarial loss				6,707
Net periodic benefit cost	\$	21,748	\$	27,189
Six months ended June 30:				
	Other Benefits			
		2023		2022

	0 11101	o mer Beneries			
	2023		2022		
Service cost	\$ 11,396	\$	16,588		
Interest cost	34,345		26,618		
Amortization of prior service credits	(2,244)		(2,242)		
Amortization of net actuarial loss			13,414		
Net periodic benefit cost	\$ 43,497	\$	54,378		

The Association's liability for the unfunded accumulated obligation for these benefits at June 30, 2023, was \$1,367,240 and is included in other liabilities on the balance sheet.

The components of net periodic benefit cost other than the service cost component are included in the line item "salaries and employee benefits" in the income statement.

The structure of the District's defined benefit pension plan is characterized as multiemployer since the assets, liabilities and cost of the plan are not segregated or separately accounted for by participating employers (Bank and Associations). The Association recognizes its amortized annual contributions to the plan as an expense. The Association previously disclosed in its financial statements for the year ended December 31, 2022, that it expected to contribute \$53,282 to the District's defined benefit pension plan in 2023. As of June 30, 2023, the full contribution has been made. The Association presently does not anticipate additional contributions to fund the defined benefit pension plan in 2023.

NOTE 8 — COMMITMENTS AND CONTINGENT LIABILITIES:

The Association is involved in various legal proceedings in the normal course of business. In the opinion of legal counsel and management, there are no legal proceedings at this time that are likely to materially affect the Association.

NOTE 9 — SUBSEQUENT EVENTS:

The Association has evaluated subsequent events through August 9, 2023, which is the date the financial statements were issued. There are no other significant events requiring disclosure as of August 9, 2023.
